CAS. The multi-brand battery system.

More than 45 powerful manufacturers have joined forces so that tools, battery packs, and chargers are 100% compatible with each other. CAS battery packs are developed in Germany and perform well even in the most demanding applications thanks to leading battery pack technology.

One battery pack, many advantages.

- Buy less battery packs
- Environmentally-friendly
- Save money

Any brand you trust. All with just one CAS battery pack.

Many brands and trades, one battery pack.
With CAS you master all working steps.

Use many advantages? All with just one CAS battery pack.

Step into a cordless world where comfort, performance, and efficiency converge. With CAS, you're not just purchasing a battery pack system, but investing in a versatile ecosystem that adapts to your varying professional needs- from everyday tasks to the most demanding jobs.

Use the largest cross-manufacturer battery pack system

Experience 100% compatibility

Discover the greatest variety of tools

Save resources

Save money

Save time

Top technology, long service life and perfect handling? It's easy with one CAS battery pack.

CAS leverages the benefits of Metabo's battery pack technology. With over 40 years of experience in battery pack development, Metabo is the pioneer in introducing new battery technologies and the concept of the "cordless construction site".

40 years of battery pack experience

15 million battery packs on the market

Compatible with 18 Volt since 2009 & in the future

As of 2009, Metabo battery packs of any generation are 100% compatible with each other – and with all machines and chargers of their volt class. This is true today and will be true tomorrow as well.

The new tabless battery generation.

The new 18 volt LiHDX battery packs elevate power to the ultimate level. Revolutionary tabless technology makes it possible.

TABLESS-DESIGN

TAB-DESIGN

The internal structure of the tabless cells has been adjusted in the 18 volt LiHDX battery packs, so that the anode and cathode are completely connected with plus and minus poles. The "tabs" are eliminated as bottlenecks, and the internal resistance of the cells is significantly reduced.

This design releases ultimate power for users, and means:

Up to 100 % more performance¹

Up to 85 % longer runtime¹

Charges twice as fast²

No matter what your work demands, we have the battery you need.

COMPACT DESIGN

Compact, robust, and efficient. LiPOWER batteries for power levels up to 1000 watts.

POWER & RUNTIME

for any requirement. LiHD batteries for power levels up to 1500 watts and long runtimes.

HEAVY DUTY WORK

LiHDX batteries with tabless technology for ultimate power up to 1800 watts.

(1) in certain heavy-duty applications; this results in less heat production inside the battery pack, compared to LiHD 8.0 Ah
(2) LiHDX with ASC 290 compared to the current standard: LiHD 8.0 Ah and ASC 145

Handling every work step? Do it all with just one battery pack.

100 % compatibility in the 18 V class! Combine your battery packs and chargers easily with the matching tools from the CAS brands. This saves you time, money and you protect the environment.

e.g. restoring the roof structure

e.g. install railings

e.g. façade mounting

e.g. wall insulation

e.g. installation of building services

e.g. electricity distribution

e.g. restoring bathrooms

e.g. maintenance
